

FNP Sales Analysis Dashboard

Executive Summary Report

Project Overview

The FNP Sales Analysis Dashboard is an interactive Microsoft Excel dashboard developed to analyze sales performance, customer purchasing behavior, product performance, and delivery efficiency. The dashboard transforms raw sales data into meaningful insights using Power Query, Power Pivot, Pivot Tables, Pivot Charts, DAX Measures, and Slicers.

Business Objective

The objective of this project is to help stakeholders monitor business performance by answering key questions such as:

- What is the total revenue generated?
- Which products generate the highest revenue?
- Which cities place the most orders?
- What are the monthly sales trends?
- Which occasions generate maximum revenue?
- How much does an average customer spend?
- How efficient is the delivery process?

Key Performance Indicators

KPI	Value
Total Orders	1,000
Total Revenue	₹35,20,984
Average Delivery Time	5.53 Days
Average Customer Spending	₹3,520.98

Key Insights

Top Products

- Magnam Set
- Quia Gift
- Dolores Gift
- Harum Pack
- Deserunt Box

These products contributed the highest revenue.

Revenue by Category

The Colors category generated the highest revenue, followed by Soft Toys and Sweets.

Monthly Revenue

Revenue peaked during March, August, and November, indicating strong seasonal demand.

Occasion-wise Revenue

The highest revenue was generated during:

- Anniversary
- Raksha Bandhan
- Holi

City Analysis

Cities such as Imphal, Dhanbad, Kavali, and Haridwar generated the highest number of orders.

Order Time Analysis

Customer purchases were highest during the evening hours, indicating the best time for promotional campaigns.

Business Recommendations

- Increase inventory for high-selling products.
- Focus marketing campaigns during peak festive seasons.
- Improve promotions for low-performing categories.
- Reduce delivery time to improve customer satisfaction.
- Launch offers during low-sales months.

Tools Used

- Microsoft Excel
- Power Query
- Power Pivot
- Pivot Tables
- Pivot Charts
- DAX
- Slicers

Conclusion

This dashboard provides valuable insights into sales performance, customer behavior, product demand, and delivery efficiency. It demonstrates practical data analysis skills by combining data cleaning, modeling, visualization, and KPI reporting to support data-driven business decisions.
